

OUR INFORMATION SECURITY, CYBER SECURITY AND PRIVACY PROTECTION MANAGEMENT SYSTEM POLICY

- √ Identify information assets, identify risks and take control measures to meet the requirements of the Information Security, Cyber Security and Privacy Protection Management System (ISMS).*
- √ Necessary measures will be taken to protect the confidentiality of customer information and to comply with standards and legal regulations.*
- √ Necessary hardware, software, training and other controls will be provided and continuously updated to reduce Information Security, Cyber Security and Privacy Protection risks.*
- √ All personnel and business partners will be made aware, trained and encouraged to ensure participation and compliance with ISMS.*
- √ ISMS will be controlled, monitored, and reviewed through internal and external audits and will be continuously harmonized with continuous improvement efforts.*
- √ This policy reflects our company's commitments within the framework of Information Security, Cyber Security, and Privacy Protection Management System (ISMS) and has been established to ensure the compliance of our employees with these principles.*
- √ This policy is a basic reference document to create a continuous security culture within the company and to ensure the effective implementation of ISMS. The policy will be updated when necessary and will be announced to all relevant parties within the company.*

We are committed to being a company.
